BIOGRAPHY

IMS EXPERIENCE	Nestor Holynskyj joined IMS in 2010 as a Director where he provides guidance and leadership to IMS clients for transforming information technology and risk management services to align those services with their business goals, delivering increased flexibility and greater return on technology investments.
PREVIOUS EXPERIENCE	<p>Prior to joining IMS, Nestor attained 25 years of experience in the information systems arena, providing clients with a strong combination of field and technical experience coupled with a management consulting background. His engagements span strategic planning, system selection, business process analysis, storage management strategies, business continuity planning, and project management. He has served clients in a variety of business sectors, including the large law firm market.</p> <p>In addition to consulting firms, he has held various positions with Bowne & Co., the leading financial printing firm in the United States. His responsibilities ranged from Chief Technology Officer of Bowne Business Solutions to Senior Director of Strategic Planning for the parent corporation. While with LANSystems Inc., a network integration firm, he was the VP of Strategic Consulting advising AmLaw 100 law firms on strategic planning for technology. As a vice president with JPMorgan of New York, he was responsible for telecommunications planning and operations for the Private Banking Division. Before joining Morgan, Mr. Holynskyj was a consultant with Booz, Allen & Hamilton where he specialized in large network designs and telecommunications audits for Fortune 100 companies. A graduate of Stevens Institute of Technology, he holds a Bachelor of Engineering degree in Electrical Engineering.</p>
EXPERTISE	Strategic planning; business process improvement; system selection
